sense way are sure to build up, on a strong and secure basis, a great commercial metropolis.

There is no reason why Louisville

should not monopolize, to a great extent, the whole trade of the Southwest, and also draw a handsome revenue from the Southeast, through the new railroad facilities.

To do this, she should act with promptness and liberality. The building and extension of railroad lines has revolutionized trade. Cities are no longer so dependent on great rivers, although these advantages must not be overlooked. Inland cities, like Indianapolis, surrounded and crowded with screaming locomotives hailing from every direction, has sprung up like Jonah's gourd. To keep our present advantage, we must not be backward in this. All these things contribute to build up the general prosperity of the city. The individual merchant, to have his name known, must advertise largely and heavily does not invariably make the advertiser wealthy and prosperous.

White majority, 2,631,500

During the war, in some States, there was a greater decrease of the colored than the white population. The Radicals hope, by the aid of the whites of their party, the negroes will be able to overtake this majority, in Tennessee, and elsewhere.

Voluntary Communications, containing interesting or important news, briefly stated, are solicited from all parts of the world.
